

Lisa C. Elias, DMD

Dear Friends/Patients,

As you may have heard, dental offices have been allowed to open by the State of Ohio, on **May 4, 2020**, for routine dental procedures. Because we care about our patients and staff, we have always kept the highest standards in infection control. We have added microbial HEPA filtration to the entire office space and are taking the additional step of screening patients and recording their temperatures prior to treatment. We are also monitoring the temperatures and wellness of our team. Additionally, during this time, we will make sure there is the necessary personal space between patients coming in for care and will continually disinfect all surfaces that can be contacted in the waiting areas. Please be safe, stay healthy, and we look forward to serving you for your dental care.

Sincerely,
Dr. Elias and Staff
